PROFESSIONAL SUMMARY

First Class Computer Science graduate (CGPA 4.63/5.00) from the Federal University of Technology, Akure (FUTA), with hands-on experience in IT support and operations, network management, hardware troubleshooting, and technical documentation. Skilled in data analysis and visualization using Excel, Power BI, Tableau, SQL, and Python, with growing competencies in data engineering (ETL/ELT, pipeline design). A Graduate Member of the Computer Professionals of Nigeria (GMCPN) with a proven track record of academic excellence, including 9 Dean's List appearances. Strong technical foundation in computer systems, software engineering, and data-driven problem solving.

EDUCATION

Federal University of Technology Akure (FUTA) | *Akure, Nigeria*

Bachelor of Technology (B.Tech) in Computer Science | 2019 – 2025

Class of Degree: First Class Honors

CGPA: 4.63/5.00

Honors & Awards:

- **Best Graduating Male Student:** Recognized as the most outstanding male student of the graduating class.
- **Dean's List:** Awarded for academic excellence in 9 consecutive semesters.

Relevant Coursework: Data Structures & Algorithms, Database Systems, Artificial Intelligence, Numerical Analysis, Operations Research, Software Engineering, Data Analysis, Computer Networks.

TECHNICAL SKILLS

- **Data Analysis & Visualization:** Python (Pandas, NumPy, Matplotlib), SQL, Power BI, Tableau, Excel (Advanced).
- **Data Engineering:** ETL/ELT Pipeline Design, Data Warehousing concepts.
- **Programming Language(s):** Python.
- **Tools & Platforms:** Git/GitHub, Jupyter Notebooks, Slack, MS Office Suite.
- **Core Competencies:** Technical Documentation, Network Management, Hardware Maintenance, Research & Technical Writing.

PUBLICATIONS

Title: An Intelligent Framework for Predictive Personal Finance Management Using Ensemble Learning and Time-Series Forecasting

- **Authors:** Ayoola S. A. and Oluwadare S. A.
- **Status:** Under Review, Journal of Information Technology and Systems (JITST).
- **Abstract:** Proposed a machine learning framework utilizing ensemble methods to predict personal financial trends, enhancing budgeting accuracy for users.

PROFESSIONAL EXPERIENCE

IT Support Specialist (Intern) | FairMoney Microfinance Bank

July 2024 – December 2024

- Orchestrated the installation and configuration of network equipment, ensuring 99% uptime for internal systems during the internship period.
- Managed asset tracking for hardware inventory, reducing equipment loss and streamlining the procurement process.
- Provided Level 1 technical support, resolving user complaints regarding hardware and network connectivity with a high resolution rate.
- Authored comprehensive technical documentation for system protocols and staff onboarding procedures.

Computer Operator & Administrator | Standard Communications

February 2022 – October 2022

- Managed daily operations during high-traffic periods, utilizing Corel Draw and MS Office to deliver document services to over 50 customers daily.
- Facilitated online registrations and application processes for clients, ensuring data accuracy and privacy compliance.
- Maintained hardware systems, performing routine troubleshooting to minimize downtime.

VOLUNTEER & LEADERSHIP EXPERIENCE

ICT Instructor (Volunteer) | Haut Classe Schools

Late 2020 – 2021

- Designed and delivered a computer literacy curriculum for primary school students, bridging the digital gap post-COVID-19 lockdown.
- Taught fundamental computing skills, including typing and basic operating system navigation, fostering early interest in technology among 30+ students.

PROJECTS

Executive Retail Dashboard (Power BI)

- Designed an interactive dashboard to visualize retail sales performance, tracking KPIs such as Total Revenue, Profit Margins, and Top-Selling Categories.
- Utilized DAX measures to calculate year-over-year growth, enabling stakeholders to identify seasonal trends.

Personal Finance Management Model (Final Year Project)

- Developed a predictive model using Python to analyze spending habits and forecast future expenses.
- Implemented ensemble learning techniques to improve prediction accuracy over standard regression models.

CERTIFICATIONS & MEMBERSHIPS

- **Graduate Member (GMCPN):** Computer Professionals Registration Council of Nigeria (CPN).
